

SWAB YOUR CHEEK FOR ALAN!

Alan and others like him need your help.

Alan is 49, father of 2 girls. He was diagnosed with leukemia and is in urgent need of a bone marrow transplant to survive. Since tissue type is inherited, Alan's best chance of finding a genetically matched donor lies with those of Jewish ancestry. However, there are many patients of all backgrounds in need of donors for transplants, so we encourage everyone to join the registry!

The power of **ONE**.
IT STARTS WITH YOU

- Eligible donors must be between the ages of 18-60 and in general good health.
- Blood type doesn't matter.
- Registration involves a simple swab of cells from the inside of the cheek. (No blood is required at this stage).
- Those previously tested do not need to be retested.
- Gift of Life's mission is to increase the representation of the Jewish people into the registry.
